

□□ ReAct □□ [Yao et al., 2023] □ OpenAI Function Calling [OpenAI, 2023]

□□ ReAct □□ [Yao et al., 2023] □ OpenAI Function Calling [OpenAI, 2023]

ReAct Loop Example [Yao et al., 2023]

Think 1: User asks Beijing weather. I need to call weather tool.

Act 1: `get_weather(city="Beijing")`

Observe 1 `{"temperature": 28, "weather": "sunny", "humidity": 45}`

Think 2: Got weather data, can reply to user directly.

Reply: Beijing is sunny today, temperature 28°C, humidity 45%. Good for outdoor activities.

Each loop: Think □ Act □ Observe, until task complete
